

Biofuel

After the feast we recycle the grease!

In partnership with our suppliers we operate a waste oil collection scheme where oil is converted into biofuel, working towards a more environmentally friendly kitchen.

Fairtrade

We support Fairtrade.

Fairtrade is a simple way to make a difference to the lives of the people who grow the things we love!

This is done by changing the way trade works through better prices, decent working conditions and a fair deal for farmers and workers in developing countries!

#Fairtrade

Local Suppliers

The origin of our ingredients is key, that is why we are proud to partner and champion local suppliers, farmers and growers for our fresh and seasonal produce.

We only select the finest quality ingredients from ethically responsible suppliers and we purchase locally and fairly to support your business community values.

Let's talk rubbish!

Recycling means making rubbish into something new!

Every day clever scientists come up with new ways to make use of things we usually consider rubbish. Think about what you throw away and whether it can be placed into a recycling bin rather than a normal bin.

LOVE FOOD

love your leftovers

sharing is caring

food can be fun!

HATE WASTE

Food Recycling

Around 7 million tonnes of food is thrown away by households in the UK every year and most of it could have been eaten.

Avoiding throwing out food that could have been eaten will not only save money but help reduce waste!

Think about all the energy, water and packaging used in food production, transportation and storage - all this goes to waste too! Help save the environment and recycle your food.

#RecycleNow
